Client Ref. No.: P2004, 0184 US N

Please replace the Abstract on page 19 with the following new Abstract:

An electrical component includes a substrate that includes one or more terminal contacts for one or more electrical component structures on a surface of the substrate. The electrical component also includes a cover having a first surface and a second surface. The cover includes one or more terminal pads on the first surface, one or more terminal contacts on the second surface, and electrical throughplatings electrically connecting the terminal pads and the contacts. The cover is on the surface of the substrate. The electrical component also includes a conductive adhesive is in one or more cavities between the substrate and the cover.
